ADVICE TO BEGINNERS.

To those starting in the pure bred dairy stock business, I wish to offer a bit of advice.

In summing up what I have gained through many years of breeding dairy cattle, I am convinced many men are in the pure bred stock business, who ought to reform or get out. On the other hand, there are still more men, who should be in the pure bred business. They would be successful and would be benefactors in their community. To buy good stock and give it poor care through neglect and lack of feed has caused many failures in the purebred world. As some have put it, the process of turning purebreds into scrubs, is not only unprofitable, but also revolting to the whole livestock industry.

To be a successful breeder, one must take an interest in his cows and be mindful of the work, which he has at hand in shaping the generations to come. Such little matters as keeping accurate records of breeding, birth, etc., are quite essential, and perhaps the most neglected duties of the average breeder. Calves should be registered, while they are young if the breeder has any intention of keeping them for breeders or selling to buyers, who wish purebreds. Much difficulty is experienced not only by breeders, but also buyers in this matter of recording. Stock should be transferred promptly after it is sold and papers should be sent to the buyerr as soon as they come from the secretaries' office.

The successful breeder is a man, who not only keeps posted on the literature of his breed, but who also takes an interest in all branches of the business. A dairy stock breeder should be interested in the subject of dairying. He should keep himself posted and the best way to do this is to read good, reliable papers and publications dealing with the subject. A breeder should feed his animals well, because by so doing, he will benefit himself and others, who may buy his stock. He cannot save money by saving feed; he had better sell his animals to save feed. An underfed animal is always unprofitable and quite liable to be unsightly, or still worse to be really damaged. It is necessary that an animal be nourished in order that it may perform its work as nature intended it. To neglect such matters means, not only an injury to yourself, but also to the men, who may buy your animals and to the breed in general.

Lastly, the breeder who has a good cow should receive the full benefit and this he can best obtain by having her officially tested. To give a cow full advantage in an official test, she should be first put in condition. A cow will always do better after having a rest period and during such a period she will increase in energy, if given sufficient feed to build up her body, and be put in what may be termed a thrifty condition. After freshening she should be brought to full feeding slowly and if a large milker, should be milked at least three times per day. —A. L. Haecker, University of Nebraska.

IOWA STATE DAIRY CONVENTION

Although it has been less than a month since the Iowa State Dairy Association fully decided to institute a dairy show in conjunction with the 34th annual convention, the management now has all plans completed for holding the greatest show of interest to dairymen and farmers ever seen west of the Mississippi River. The convention and show will be held in Waterloo, October 10th to 16th, and promises to be a great factor in arousing dairy enthusiasm and interest in better dairy methods and conditions. Iowa and the central west have awakened to the merits of dairy cattle for the purpose of producing milk and butter. The demand for foundation cattle and especially dairy bred bulls is becoming enormous. Waterloo has already become known as the dairy center of Iowa and the central west offers most excellent inducements for the convention and dairy cattle show. At Chautauqua Park, which is a beautiful 12-acre tract lying along the Cedar River, there is a coliseum 160 feet in diameter which provides room for nearly 450 head of cattle besides sufficient space for housing a great number of exhibits of machinery, butter and other exhibits. In addition to this there are several other smaller buildings suitable for holding convention meetings and other assemblies. Provision has been made for erecting two large tents; one for a stock judging pavilion and the other for an assembly room where the large night meetings will be held. The premium list for cattle aggregates over $2,200 which is to be divided between the four principal breeds of dairy cattle, namely: Jerseys, Guernseys, Holsteins and Ayrshires. Dairymen from all over the United States are interested in the show and entries from the best breeders from New Hampshire, Kentucky, Illinois, Michigan, Wisconsin, Minnesota, Nebraska, Missouri and Iowa are now on file. Owing to the fact that the Iowa Dairy Show immediately follows the last state fair and just precedes the National Dairy Show, it is possible to secure the most excellent cattle that have been ex-

hibited at all of the different state fairs during the season. The butter exhibits promise to be greater in number than ever before and it is believed that at least 350 of the 543 creameries in Iowa will be represented by tubs of butter. The prizes for this product have been increased to $1,000, besides the gold and silver medals which are offered as special premiums. The premium list which has been arranged will not only prove interesting and instructive to the buttermaker and farmer but will be pleasing and entertaining to all who visit the convention and show. The number of cattle will be so great that every day during the show judges will be at work placing the prizes. In the lecture tent morning, afternoon and evening there will be lectures by the most noted dairy authorities and experts of America as well as addresses by many of the most noted orators which can and are being secured. The city of Waterloo is taking an active part in making preparations for the greatest convention ever held within her limits. Various committees have been formed to assist the management of the show in every possible way. A transportation committee is making efforts to secure rates on all railroads. Another committee is at work securing hotel accommodations and lodging for the visitors. Although large crowds are expected, rooms and meals will be provided at reasonable prices. It is not only the desire of the Iowa State Dairy Association to make this convention and show a feature of unusual interest this year alone but if the support of those interested in dairying is sufficiently great a corresponding week will be reserved each year and the show and convention made an annual event. To be most successful in this venture the association realizes the necessity of increasing its membership which will likely be increased this year to over 2,000. It is realized that the interests of the buttermaker and the farmer are so closely allied that they should be brought together and a united effort made to further the dairy interests of Iowa. This is the one great result that the Iowa Dairy Exposition should and very likely will attain.

HUGH G. VAN PELT,
General Manager.

Field Notes.

Bulletin 183, Ontario Department of Agriculture, is a treatise on Chedder Cheese-making by Frank Herns and G. G. Publow, chief dairy instructors for Ontario.

According to Alfred A. Winslow of Valparaiso, there were in 1909 216,-132 milch cows in Chile, an increase of 11,048 over the preceding year. The price of butter according to season and location, ranges from 30 to 70 cents per pound in U. S. Gold.

Prof. H. H. Wing's judging team at Cornell Agricultural College, eight strong, judged Holstein-Friesians, and incidently, other breeds of cattle as well, at the Chemung County Fair, September 19th and 20th. J Sloat Wells, of Elmira, drew most of the firsts in the Holstein-Friesian classes.

By an oversight on the part of the Holstein-Friesian World representative at the New York State Fair, Shelter Valley Gem Segis, who won third in the class of bulls under one year, was left out of the report. This fine calf entered by R. M. Stone & Son, Marcellus, N. Y., was sold to Wm. S. Van Valkenburg, Little Falls, N. Y. See Mr. Stone's article in Breeders' Bulletin Board.

Consul John F. Jewell, of Melbourne, Australia, furnishes a copy of the official review of the butter trade of Victoria, from which it is shown that the total amount of butter received at Melbourne from the several districts of the state amounted to 46,642,400 pounds during 1909, while the exports for 1909-10 amounted to 36,388,000 pounds, which was the highest figure attained in the history of the export trade.

The American Dairy Farmer's Association will hold its annual convention in connection with the National Dairy Show at the Coliseum in Chicago, Ill., on October 25, 1910. The convention will be called to order at 10 a. m., and there well be afternoon and evening sessions to be followed by a banquet. Delegates from every state in the Union and from Canada are expected to be present and topics of live interest to dairy farmers will be discussed by dairymen of world-wide reputation. The program will be announced later.

Signed, HELMER RABILD,
Secretary-Treasurer.

HOLSTEIN-FRIESIAN WORLD UNPOPULAR AT ROCKDALE.

Editor H.-F. World:

My attention has been called to the difference in notes given in your paper and the Holstein-Friesian Register of the Hartford Fair, where Rockdale Perfection De Kol took first in his class, championship, grand-championship and Holstein-Friesian special; that is, every prize possible.

As Perfection is the pride of the hearts of my men, they are naturally very hot about it. Perfection is generally acknowledged to be the most perfect bull of the advanced dairy type Holstein, which is what I believe in.

I told my men all about Mr. Fuller; what a nice pleasant man he was, but his interests were distinctly antagonistic to the Holstein breed and using his report was an over-sight by the Holstein-Friesian World, which you personally probably knew nothing about.

Second Lake Mills Breeders' Sale

Lake Mills, Wisconsin, October 25 and 26

Two full days Consignments from fifteen or more leading Wisconsin herds—Upwards of 225 registered Holsteins to go to the highest bidder: heavy-milking cows, fresh or soon due; heifers bred, yearlings, calves, finely bred bulls—everything in good cattle.

A Good Time and a Good Place to do Your Buying

Sale to be held in newly equipped sale building, provided with every appointment for the comfort of the cattle and the cattle purchasers. Shipping facilities unsurpassed—four cars can be handled at a time. You who have had experience shipping cattle, will appreciate these advantages.

We invite you to be present, whether you want to buy this fall or not. We promise you an array of as fine cattle as the market affords—in every way representative of the Lake Mills Standard of quality. Write for catalog, to

E. J. Fargo
Wm. Everson & Sons

I have never heard of a bull attracting as much attention as Perfection has created wherever seen. He and other Rockdale Holsteins are opening the eyes of the breeders of the sluggish, beefy, coarse-bred Holsteins and starting them thinking about the economies of the strictly dairy type.

I expected it would take me years to accomplish what I am after in Holstein breeding, but it is coming very much faster than I had any hope for.

I personally appreciate our mutual frendly feeling, but your paper is certainly now very unpopular with my men at Rockdale.

HENRY IVES COBB.

HOLSTEIN-FRIESIANS AT CALIFORNIA STATE FAIR.

Exhibitors—A. W. Morris & Sons, Woodland; University of Nevada, Reno; Vina Ranch, Vina.

The main surprise was in the judge putting the most popular cow in California, Juliana De Kol, at one time holder of the world's two-year-old 30-day record for the breed, back to 3rd place and leaving De Kol of Valley Mead, the cow that Professor Carlyle eulogized so highly, out altogether. Juliana was first last year. This year first place went to a former California owned cow, Stafford Mercedes Aaggie Tubie, now owned by the University of Nevada. The same institution also won first on aged bull, Sarcastic Blossom Lad.

Bulls, 3 Years Old or Over.

1st. Sarcastic Blossom Lad. 2d. Juliana King of Riverside, A. W. Morris & Sons. 3rd. Canary John Victoria, Vina Ranch.

Bulls, 2 Years Old and Under 3.

1st. Hill Paul, Vina Ranch. 2d. King Mead of Riverside, A. W. Morris & Sons.

Editorials

Ohio Sale Catalogue

We are in receipt of the catalogue of the First Annual Consignment Sale of the Northern Ohio Holstein-Friesian Breeders' Consignment Sale Company. It was edited by E. M. Hastings of Lacona, N. Y., and printed by the Corse Press, Sandy Creek, N.Y., and is a work of art. Besides illustrations it contains the extended pedigrees of 73 animals. In running over its pages we were impressed by the frequent occurrence of the names of such famous sires as Hengerveld De Kol, De Kol 2nd.'s Butter Boy, De Kol 2nd.'s Mutual Paul, Admiral Walker Pietertje, King Segis, Butter Boy Pietertje, Rockdale Perfection De Kol, King Fayne Segis, Poniac Korndyke, and many others.

October Consignment Sales

October is destined to be a lively month in Holstein-Friesian circles, judging from the number and importance of the Consignment Sales advertised to take place from the 11th to the 26th instant. The first in the schedule is the Hunt-Cleveland sale, which is to occur on the 11th and 12th at the state fair grounds, Syracuse, N. Y. Ten well known breeders of New York and New Jersey have contributed 200 head to this sale—125 young cows, 50 heifers and 25 young bulls—all choice individuals and many from high-record ancestors. It can be said that sixteen of the cows offered have official records ranging between 12.29 pounds for a two-year-old to 27.94 pounds for a mature cow. Eleven of the number have dams with official records ranging between 20.81 pounds and 27.09 pounds, and ten of the young bulls are from dams with records from 16 pounds as a two-year-old to 29.09 pounds for a mature cow.

Messrs. Hunt and Cleveland have spared no effort or expense to maintain their well-earned reputation for sale-management.

Following on the heel of the Hunt-Cleveland sale, October 13th, comes the Northern Ohio Holstein-Friesian Consignment Sale, the well-known breeders, H. . Russell, Burton, C. C. Smith, Parkman, and F. W. Pierce, East Clarendon, promoters. A letter in this issue of the World by W. P. Carter of Cleveland, a contributor to the sale, as well as letters from Messers. Russell, Pierce and Hastings, in preceding issues have described in part the offerings at this sale which will consist of 80 head, made up of fresh cows, heifers bred to well-known and noted sires of the breed, and herd sires of distinction. This sale will be held at Burton, near Cleveland, the Holstein-Friesian center of the state.

On October 20th will be held the third Michigan Consignment Sale at the State Fair Grounds in Detroit. Nine of Michigan's leading breeders have contributed 125 head to this sale. An indication of the merit of this consignment may appear from the fact that the dams of the herd sires from these nine consignments average 514.49 pounds milk, 25.12 pounds butter in a week. Percent fat 3.84. Read J. Fred Smith's letter in this issue of the World.

As a fitting climax to this quartet of sales, comes the Second Lake Mills Breeders' Sale at Lake Mills, Wis., October 25 and 26. The names of Holstein-Friesian breeders constituting this company—C. R. Montague, Frank B. Fargo, Frank H. Everson, Milan D. Demerit, E. J. Fargo, William Everson & Sons—are a guarantee that this sale will hold up the reputation of the breed, and be a banner sale in every particular. In point of numbers, this will be the largest of the four sales, and will present every quality desirable in Holstein-Friesians, including age, sex, individuality and fashionable breeding. The fact that our popular sale agent and pedigree compiler, E. M. Hastings of Lacona, N. Y., has edited the catalogue and is to manage the sale will contribute much to its success.

The Hunt-Cleveland Sale, October 11th and 12th; the Northern Ohio Consignment Sale, October 13th; the Michigan Consignment Sale, the 20th, and the Lake Mills Consignment Sale the 25th and 26th,—New York, Ohio, Michigan, Wisconsin—truly, Holstein-Friesian sales, like the tide of empire, westward takes their way.

NEW ADVERTISEMENTS.

For a fine lot of fall and winter cows write E. M. Hastings, Lacona, N. Y.

The Hunt-Cleveland Sale at the Fair Grounds, Syracuse, October 11 and 12. You can't afford to miss it.

If you want cows due to freshen this fall go to Stevens Brothers, Liverpool, N. Y. They also have choice young bulls for sale.

If you want a calf from 30-pound ancestors, write A. A. Hartshorn, Hamilton, N. Y., for a price on the son of Clarabell Goudgeld.

The second annual sale of the Lake Mills Consignment Sale Company at Lake Mills, Wis., October 25 and 26.—225 head, everything in good cattle.

The advertisement of the Northern Ohio Breeders' Sale describes a few of the animals that you will have a chance to purchase on October 13. This is a rare chance.

The third annual Michigan Consignment Sale which occurs on the state fair grounds, Detroit, October 20, will offer 125 head of choice cows, yearlings, calves and young sires. The Company has purposed to make this its banner sale.

Breeders' Bulletin Board

THE MICHIGAN CONSIGNMENT SALE.

Editor H.-F. World:

In sending you advertisement of our sale October 20th, at Detroit, I want to say our company met this week at the State Fair, and all were enthusiastic about our sale and were anxious to make it the best sale we have had.

John Worthington will put in twenty head, nearly all in calf to his fine young bull, Korndyke Pontiac Butter King, that is siring some fine young heifers; some I have seen looks as if they might come close to the record of his illustrious sister, Pontial Rag Apple. It looks now as if any one who buys a cow in calf to this young bull will get a calf which may be worth much more than the cow cost. In looking over the herds some time ago I was much impressed with the young things sired by Pietertje Hengerveld Mercena De Kol, and the Korndyke bull owned in partnership

SOME SAMPLE SELECTIONS

From the Catalog of the

Northern Ohio Breeders' Sale Burton, O., Oct. 13

No. 3. Aaggie Cornucopia Queen, 74817. Six years old; will be fresh. A fine, large cow; a granddaughter of the World's Champion senior 4-year-old, Aaggie Cornucopia Pauline (34.32 pounds), who is dam of the 31-pound cow, Aaggie Cornucopia Pauline 2nd.

SIRE—Aaggie Cornucopia Pauline Count, 29642.

DAM—Alma De Kol Queen, 62481, a 19-pound daughter of Butter Boy Pietertje and the 20.77-pound cow, Alma De Kol. Butter Boy Pietertje is a well known A. R. O. sire, and is a son of De Kol 2nd.'s Butter Boy 3rd., and the first cow of the breed to give 100 pounds milk in a day in A. R. O. test—Aaggie Grace 2nd's Pietertje.

No. 32. Klara Cornucopia De Kol, 91694. Four years old; bred February 3 to Paul Beets Walker (a son of Admiral Walker Pietertje and the famous 30-pound cow, Paul Beets De Kol Girl).

SIRE—Aaggie Cornucopia 3d's Lilith, 34467,

DAM—Klara De Kol Butter Girl, a 23-pound daughter of Butter Boy Pietertje and the 18-pound, 4½-year-old, Spring Brook Rose De Kol, her dam being a 17½-pound cow, with two A. R. O. daughters.

No. 37. Craddock Vale, 75639. Six years old; bred June 5 to Crown Prince Segis (a son of King Segis and the 31-pound cow, Winana De Kol Korndyke).

SIRE—Paul De Kol, Jr., 24762. (Enough said.)

DAM—Homestead Cradock De Kol, 49460, a 22-pound daughter of Pietertje Hengerveld's Paul De Kol.

No. 43. Prilly Watt, 119096. Heifer bred June 17 to Segis Fayne Hengerveld (a son of Mr. Cortelyou's King Fayne Segis and the World's Champion junior 3-year-old, Bloomingdale Hengerveld Ormsby—31.46; the 7-day butter records of this bull's dam and sire's dam average over 33½ pounds, and the dam only a junior 3-year-old).

SIRE—Admiral Prilly Walker, 42562, a son of Admiral Walker Pietertje and the 26.91-pound cow, Mildred Walker, whose dam is Prilly (25.20-pounds). Admiral Prilly Walker is a full brother to a 26.84-pound 4½-year-old, and it would take a volume to tell all the good points in his family history.

No. 44. Another daughter of Admiral Prilly Walker, bred June 12 to Segis Fayne Hengerveld.

Nos. 53 and 59. Heifer calves; daughters of King Pontiac Royal, a son of King of the Pontiacs and Maid Hengerveld Mutual De Kol, who is a daughter of Hengerveld De Kol and the 31-pound cow, Maid Mutual De Kol.

Nos. 67 and 68. Two-year-old daughters of Admiral Prilly Walker.

The list might be continued until all the entries (73 in number) had been mentioned, and every one would represent a desirable offering.

The reference sires in the front of the catalogue are as notable a lot as can often be grouped together, and in addition to Crown Prince Segis, Butter Boy Pietertje, Segis Fayne Hengerveld and Paul Beets Walker include De Kol 2nd's Mutual Paul (Sire of two 30-pound cows, and the only living son of De Kol 2nd and Pontiac Hengerveld Parthenea).

This is designed to be the first of an annual series, and in this initial event, the breeders of Ohio are doing their best to make a right beginning.

THE PLACE—Burton, Ohio (Take electric car from Cleveland not later than 8 o'clock the morning of the sale).

THE TIME—Thursday, October 13, 10:00 a. m.

Editor of Catalog - E. M. Hastings, Lacona, N. Y.

by Messrs. Crandall, Norton and Johnson, which are siring some very choice things.

Mr. Pierson's bull is of the low down type and is siring some calves that handle fine.

Mr. Eager is following the fairs and is getting his share of the premiums, he had the champion and grand champion show bull at the state fair, and the West Michigan fair at Grand Rapids.

Mr. Norton owns King Pietertje Hartog, from a 27-pound three year old and grand son of Beauty Pietertje (30½ pounds) that is destined to leave some fine heifers with good records if appearance has anything to do with it.

Elzevere Sir Canary Barnum De Kol has only one daughter in milk yet, but has a number of yearlings some to freshen this winter. I am not offering any of his heifers, but I shall put in the sale ten cows and heifers mostly in calf to this fine bull, which is a son of the cow that topped the consignment sale at Syracuse in 1908 at $1,300.

Those who are looking for choice cows will do well to be at this sale.

J. FRED SMITH.

T. D. Matson Purchases a Fine Calf.

T. D. Matson & Co., of Holley, Orleans Co., N. Y., write that they have recently purchased of Mr. C. H. Fiske, Syracuse, N. Y., a bull calf, Segis Fayne Hengerveld 2d, whose dam is King Segis Celestie De Kol, a daughter of King Segis, with a butter record in 7 days of 20.19 pounds at 2 years, 1month and 7 days of age. He was sired by Segis-Fayne Hengerveld, a son of King-Fayne-Segis, whose dam, Bloomingdale Hengerveld Ormsby, has a butter record of 31.46 pounds in 7 days at 3 years of age. His granddam, Grace Fayne 2d.'s Homestead, holds the world's record of 35.55 pounds in 7 days. The calf is a fine individual, nicely marked, about three-fourths white, and four months old.

September 26, 1910.

SHELTER VALLEY GEM SEGIS.

Marcellus, N. Y., Sept. 26, 1910.

Ed. Holstein-Friesian World,

My World arrived to-day and in your write-up of the awards I find that Shelt r Valley Gem Segis 71737 was not credited with having won 3rd. in the class for bulls under one year. Since there were twenty-two entries in this class, and some of the best breeders represented, we think it some honor to even get a 3rd. This young bull mentioned above is by a Son of King Segis, out of a 24.95 pound four-year-old daughter of Paul Beets De Kol.

His 1st dam has a 14.08 (one year) A. R. O., Fat 4.12 per cent. Second dam has a 22.61 A. R. O. Fat 4.54 percent. Third dam, Gen'e Clothilde, 30.05 A. R. O. Fat 3.76 per cent. His dam and two grand-dams average 4.23 percent fat. Seven dams average on official test 4.03 percent.

This youngster, who is seven-eighths white, and a fine individual in every respect, was sold September 16 to Milliam S. VanValkenburg, Little Falls, N. Y.

Among those who bought bulls from us at the Fair and contemplate building up a herd of thorough-breds are E. M. Holmes, Yorkshire, N. Y., Geo. Pelton, Sherman, N. Y., Allis Bros., Wysox, Pa.

R. M. STONE & SON.

OHIO BREEDERS' CONSIGNMENT SALE.

Permit me to enlarge a little on my entries in the Breeders Consignment Sale to be held at Burton, O., October 13, 1910, when 80 head of choice registered cattle will be sold under the hammer. I have entered nine head, five of them having been bred last June to Segis Fayne Hengerveld, whose dam and sire's dam have a seven-day average of over 33.5 pounds, with the remarkable high butter fat average of 5.11. The dam of Segis Fayne Hengerveld is what might be called a real butter cow, she having made 127.95 pounds of butter in 30 days, with a thirty-day butter fat average of 4.88 percent., exceeding in percent any other Holstein cow on a thirty-day test. Her name is Bloomingdale Hengerveld Ormsby and she is a daughter of the great Hengerveld De Kol, 115 A. R. O. daughters, four of them having records exceeding thirty pounds in seven days. Her record is the more remarkable in that it was made in her junior three-year form. Segis Fayne Hengerveld was sired by King Fayne Segis, a son of Mr. Moyer's King Segis and the world's champion cow, Grace Fayne 2d.'s Homestead. If there is a better bred bull from any standpoint we would be pleased to know of it. Of the cows bred to him I will ask space to say that two are sired by Admiral Prilly Walker, whose dam, Mildred Walker, is a 26.91-pound daughter of Prilly, whose six large record daughters put her in a class by herself. Admiral Prilly Walker has a four-year-old half-sister on his dam's side. On his sire's side he has 21 A. R. O. sisters that at the average age of two years, seven months, have made an average of 19.33 pounds of butter in seven days. This includes every daughter of his sire and is in itself a very remarkable showing. The firm of C. C. Smith & Son have also consigned two of his daughters that should command a good price. There is also a high-producing Kuperur cow seven years old, and a choice three-year-old grand-daughter of Count Jewel Mechthilde, sire of some very high record cows. They are bred to Segis Fayne Hengerveld. I have also entered a fine son of his, six weeks old and out of an inbred Pietertje De Kol cow, that should make a great herd header for some breeder. The first son of this bull has just been sold for $350, which is a good price for a calf from a yearling bull without one A. R. O. daughter.

Then too, I have entered a very fine yearling heifer whose dam is a grand-daughter of De Kol 2d.'s Butter Boy 3d. and a full sister to a twenty-eight-pound cow. This heifer has been bred to a son of King of the Pontiacs, and it will not be long before breeders will be anxious to own grand-sons or grand-daughters of King of the Pontiacs.

One choice bull calf is also entered, sired by a twenty-six-pound Korndyke bull, and has for a dam an extra choice daughter of Pitertje Hengerveld Count De Kol (98 A. R. O. daughters.) Unless I am much mistaken, this sale will be a great place to buy a choice bull of any desired age, for there are sons of two thirty-one-pound bulls, and one thirty-pound bull. There surely is quality to be found on every page of the catalog and the consignors feel that they are entitled to an appreciative lot of bidders.

W. P. CARTER.

ALBINA BUTTER BOY. FIRST PRIZE AND JUNIOR CHAMPION.

As many of the readers of the World saw, we had a small exhibit at the New York State Fair this year. We have had our herd tuberculin tested by veterinarians delegated for that purpose by the Commissioner of Agriculture of this state, and we did not get our certificates or permission to move our stock until the Friday before the fair opened. In anticipation, hovever, we had our entries in, so hurriedly got a show herd together, several of them being shipped from Lacona, among them Jannek Albina De Kol 3d. and 4th., and the yearling son of the former, Albina Butter Boy. This young bull probably attracted as much attention there as any animal we exhibited, unless it was the daughters of King of the Pontiacs we had there on official test, K. P. Jewel at 32 months old producing 19.8 pounds butter in seven days and K. P. Duplicate 21.3 pounds at 33 months, certainly tremendous records for two year old heifers to make at this time of year and in such a place. Albina Butter Boy not only won first prize as a yearling but also was awarded the junior championship, a remarkable showing for an animal to make without any preliminary fitting for the show ring. He is a very handsome bull with a beautiful head and neck, is straight and level on the back, carrying out straight as a gun barrel to the tailhead, a deep chest, large barrel, good milk vein development, and is a splendid handler. He is fashionably marked, a thing we take very little notice of ourselves for we find no proportion of colors has a monopoly of production and some of our darkest animals are our best producing ones.

Albina Butter Boy was sired by the great De Kol 2d.'s Butter Boy 3d., who has more sons with A. R. O. daughters than any other sire, and who has 92 A. R. O. daughters, many, age considered, with tremendous records, among them being King Segis Inka 2d., 13,454.5 pounds milk, 727.39 pounds butter in 349 days, and Copia Hengerveld 2d.'s Buttercup, 18,349.3 pounds milk, 849.93 pounds butter in 365 days, all as two year old heifers, first calving.

Jannek Albina De Kol 3d., dam of Albina Butter Boy, was placed second in the aged cow class at the same fair, a great honor, conditions considered, as she had been in milk since January 4th last, when she dropped a very fine bull calf sired by King Pontiac Champion. This cow has given 100 pounds milk in a day and at four years old produced 29.71 pounds of butter in seven days. She is a magnificent specimen of the ideal Holstein-Friesian cow, large and vigorous, straight and level on the back, with a large barrel, immense udder, splendidly balanced and proportioned, teats of the right size well placed, and a great milk vein development. She was sired

Moyerdale Herd

KING SEGIS AT SIX YEARS OF AGE

Thirteen 20-lb. 2-year-old daughters. Fifty-three officially tested daughters. Four of his daughters have held world records. Five of his daughters sold in our June Sale by Auction at an average price of $942 each.

Five of his first 3-year-old daughters with records from 26.63 to 29.79.

Countess Segis	3 years	29.79	Netherland Segis	3½ years	26.92
Bell Segis	3½ years	28.80	Segis Tehee Beets	3 years	26.63
Princess Segis	3 years	27.60			

The average records of his five 3-year-old daughters is 27.94, which is greater than any other five 3-year-olds sired by any other sire no matter what his age may be, and I don't care how many 3-year-old daughters he may have to pick the five from.

If you want a bull to head your herd sired by the greatest sire of the breed, buy a son of King Segis, as he is in a class by himself, and has no equal as a sire of great two and three-year-olds, which are his oldest daughters that have been tested.

I have but three of his sons for sale, their dams' records, are as follows: 30.51, 28.60, and 27.47.

H. A. Moyer, Syracuse, N. Y. : James Gillett, Supt.

by Korndyke Queen De Kol's Prince, sire of Winana Korndyke De Kol 31.22 pounds and Lunde Korndyke 30.84 pounds. This last cow has given more milk in 100 days of semi-offiicial test than ever before has been produced by any cow of any breed. Jannek Albina De Kol, dam of Jannek 3d., has an A. R. O. record of 22.04 pounds butter in seven days. Her sire was Pietertje Alban De Kol and her dam Jannek Bright, 18.41 pounds at four years old, and Brookside Albina Cornucopia 20.02 pounds at three years old. This whole family are splendid individuals of large size, show animals in every respect and we don't believe we ever saw a family of cows with nicer udders.

We selected Albina Butter Boy as much for the type and individuality of himself and his near relatives as we did for his breeding, superb although it is. We believe size, type and constitution can and should be combined with the greatest production, and in selecting for service in Brookside Herd our great quartette of bulls, King of the Pontiacs, King Segis Pontiac, King Pontiac Artis and Albina Butter Boy we have had these points constantly in view.

Albina Butter Boy will be kept at Lacona, where we still have two farms devoted to raising pure-bred cattle. We have sold a half interest in this bull to the firm of Henry Stevens & Son, and he will be used in both herds. Albina Butter Boy will be given a great opportunity to become a noted sire, and we have confidence that the future history of the breed will record him as one of the most prominent of the sons of the great transmitting sire, De Kol 2d.'s Butter Boy 3d.

STEVENS BROTHERS CO.

HOLSTEIN-FRIESIANS AT THE INDIANA STATE FAIR.

The Holsteins put up a good show, the exhibitors being E. L. Zehring, Germantown, O.; Derrer Bros., Camp Chase, O.; J. D. Nidlinger & Son, Decatur, Ind.; C. C. Smith & Son, Parkman, O. Professor C. S. Plumb tied the ribbons, and the line up was as follows:

Bull Three Years Old or Over—1st, Count America Nudine, Smith; 2nd, Parthenea Sarcastic, Zehring; 3rd, Pontica Hengerveld Parthenea, Smith.

Bull Two Years Old and Under Three—1st, Paul Beets Burke, Smith; 2nd, Manor Josephine, Zehring.

Bull One Year Old and Under Two—1st, Johanna Colantha De Vries Lad, Derrer Bros.; 2nd, Oak Valley Paul, Nidlinger; 3rd, Aroc Lillie Pietertje, Smith.

Bull Calf Under One Year—1st, Johanna Beauty Lad, Derrer Bros.; 2nd, Parthenea Sarcastic 3rd, Zehring; 3rd, Clyde Paul de Kol, Derrer Bros.

Cow Three Years Old or Over—1st, Minnie Stein, Nidlinger; 2nd, Dulcinia, Derrer Bros.; 3rd, Bodera Lincola Veltbois, Nidlinger.

Heifer Two Years Old and Under Three—1st, Johanna De Vries, Derrer Bros.; 2nd, W. H. McQuistom, Whiteland; 3rd, Spring Brook Aaggie Clothilde, Smith.

Heifer One Year Old and Under Two—1st, Spring Hill, Smith; 2nd, Popular, Derrer Bros.; 3rd, American Topsy, Smith.

Heifer Calf Under One Year—1st, On Time, Derrer Bros.; 2nd, Miss Sharp, Derrer Bros.; 3rd, Semele Seyis Cornucopia, Nidlinger.

Get of Sire—1st, Derrer Bros.; 2nd, Zehring; 3rd, Smith.

Produce of Cow—1st, Smith; 2nd, Derrer Bros.; 3rd, McQuiston.

Aged Herd—1st, Derrer Bros.; 2nd, Zehring; 3rd, Smith.

Champion Bull Two Years Old or Over—Smith.

Champion Bull Under Two Years Oul—Derrer Bros.

Champion Cow Two Years Old or Over—Nidlinger.

Champion Heifer Under Two Years Old—Smith.

DAIRY SHOW NOTES.

The Big Cheese.

The big full cream cheese made expressly for the National Dairy Show to be held in Chicago, October 20-29, has been safely landed in a cold storage warehouse in the city where it is being cured. The cheese is so big that the maker built it upon a flat car, using a great hoop of galvanized iron 15 feet in circumstance. It required over twenty tons of milk to furnish the curd for the cheese, which is four feet and eight inches in diameter and three feet nine and one-half inches in height. It is of fine quality and is believed to be the largest cheese ever made.

The Baby Feeding Demonstration.

What promises to be one of the most interesting educational features of the National Dairy Show at Chicago, is the baby feeding demonstration to be conducted by the City Health Department, the United Charities and the Chicago Milk Commission. A large number of babies, from six to eight months of age will be in charge of trained nurses day and night and will be fed according to scientific methods on milk examined bacteriologically

right at the Show. Substantial prizes will be offered the mothers of these babies and these rewards will be made on a practical and scientific basis. In addition to instructing and entertaining the visitor at the Show it is hoped to make this feature one of great value to the mothers of bottle fed babies.

The Machinery Display.

Exhibitors of creamery and dairy machinery at the National Dairy Show promise the most complete showing of their lines ever made. In spite of the fact that almost perfection seems to have been reached in the production of such goods, each year sees a great improvement, and labor saving and more sanitary devices are being continually invented. A study of the best in this line alone repays the dairy farmer or the factory operator for time and money expended in making the trip.

Board of Directors' Meeting.

A meeting of the board of directors of the National Dairy Show Association was held in Chicago September 26th. Manager Van Norman submitted details of the work incident to the Show and these were discussed and passed upon. Hon. W. B. Barney of Iowa was elected Superintendent of the cattle exhibit and Hugh G. Van Pelt of Iowa and E. C. Foote of Ohio were selected as assistants. The directors are enthusiastic over the prospects for the most successful Show ever held by the Association.

Butter Sculptures at Work.

In addition to exhibits of sculptured butter at the National Dairy Show, the actual work of making the figures will be demonstrated by two Chicago artists who have been engaged for the entire Show. They will work upon a raised platform in plain view of the audience from all sides. After the figures are completed they will be placed in the big refrigerator.

Prizes to Herdsmen.

A suitable medal will be awarded to the herdsman in each breed of cattle at the National Dairy Show, who received the highest marking on the following features of his work.

1. Condition of cattle.
2. Condition of stalls and equipment.
3. Promptness in getting cattle to and from judging arena.

The superintendent of the cattle department will decide the winners.

Conventions at National Dairy Show.

The following organizations will hold conventions at the National Dairy Show on the dates mentioned. The convention hall is in the Coliseum.

International Milk Dealers' Association, Monday, October 24.

Official Dairy Instructors' Association, Monday, October 24.

American Guernsey Cattle Club, Monday, October 24. (Banquet.)

American Dairy Farmers' Association, Tuesday, October 25.

National Creamery Buttermaker's Association, Wednesday, Thursday and Friday, October 25-27.

Holstein-Friesian Association, Tuesday, October 25. (Banquet.)

American Association of Creamery Butter Manufacturers, Wednesday evening, October 26. (Banquet).

American Jersey Cattle Club, Wednesday, October 26. (Banquet).

National Dairy Union, Thursday, October 27.

A handsome silk banner will be awarded to the creamery organization sending the largest delegation of its patrons to the National Dairy Show at Chicago, October 20-29. The patrons must all come from the same locality. This will be a prize and distinction worth striving for.

To Educate the Consumer.

It is announced by the management of the National Dairy Show that a particular effort will be made to appeal strongly to the visitor at the show who is unfamiliar with dairying and methods of putting dairy products upon the market. Particular emphasis will be placed on those features which instruct and interest him, without detracting from the educational features in which the dairyman is interested. The purpose of this effort is not only to please this uninformed visitor but to create in his mind an understanding of the effort and expense necessary to produce dairy products of good quality. He will then demand high quality and will be willing to pay the price necessary to secure it.

Dairy Show Premium List.

The Dairy Cattle Premium Lists for the National Dairy Show have been mailed to prospective exhibitors. Parties not receiving them will be accommodated on request.

Largest in the World.

The mammoth cheese which is to be made for the National Dairy Show will weigh nearly 4,000 pounds instead of 2,000 as previously announced. It will be made on a flat car and taken to Chicago with appropriate ceremonies. It will be the largest cheese ever pressed.

Visitors at the National Dairy Show will this year be able to purchase dairy products there. This will prove a novel feature to city people who can see the articles produced and then carry them home as souvenirs.

The dairy buttermakers and market milk and cream producers should communicate with the National Dairy Show Association, 1305 Unity Building, Chicago, for premium lists on dairy butter and milk and cream.

Cheesemakers will be interested in learning that the prizes on cheese at the coming National Dairy Show have been greatly increased. Premium lists will be mailed on application to the National Dairy Show Association, 1305 Unity Building, Chicago.

Japs at the Dairy Show.

One of the most interested visitors to the National Dairy Show in Milwaukee was Mr. T. Ogawa, scion of wealthy Japanese parents and a graduate of the Kansas State Agricultural College. He was accompanied by Prof. A. Miyowaki, assistant dairy instructor in the Kansas institution. Mr. Ogawa is at present employed on the farm of L. G. Oder, Juda, Wis., and is now working as a practical dairyman and buttermaker, preparatory to returning to Nippon, there to join others in the development of dairying in the Mikado's kingdom.

South interested in the Dairy Show.

Among the many prominent dairy educators in attendance on the Dairy Show in Milwaukee were Professors S. E. Barnes, of Knoxville, Tenn., and R. R. Welch, of Raleigh, N. C. Mr. Barnes is the federal dairy expert for the State of Tennessee, and is now secretary and treasurer of the Tennessee Dairymen's Association, be sides being in charge of the Dairy Department at the Tennessee Experiment Station. Prof. Welch is also employed by the United States government, and is doing an important work in the upbuilding of the dairy industry in South Carolina and adjoining states. Both these gentlemen were very favorably impressed with the various features of the Dairy Show, and anticipated by next year a greatly increased interest in it on the part of the dairy farmers and breeders of the south.

PRIDE OF THE WHITE HOUSE.

"Pauline," the pride of Wisconsin, daughter of "Gertrude," the chief rival of "Josephine," champion of Missouri, is to become the property of President and Mrs. Taft.

Pauline will have all the privileges of the white lot, just back of the White House, where the very best of grass is being grown for her benefit. Pauline will take the place of "Mooley," whom President Taft made the first cow of the land shortly after the inauguration, a year ago. Mooley died.

The reign of Pauline begun with September. Just now she is rather young and inexperienced, but gives every promise of becoming well qualified for a queen of cows.

I MUST INTERRUPT

The series telling of the work we are turning out for such representative breeders and business men as T. H. Russell, John Arfmann, T. A. Mitchell, The Fred F. Field Holstein Company, and others of like reputation to appear in later chapters—I must break the chain for the purpose of letting you know that I have a number of *Cows for Sale Due to Freshen This Fall and Early Winter* Large, straight, finely developed, well bred, and in calf by a first class sire; cows that are perfect, and that are worth more money than we shall ask for them (I own a half interest in these cattle. They can be seen on the farm of H. A. Prescott, one mile fran Lacona station. We must sell at once, because we lack room to get them into the stable. These cows are *Good* ones in fine condition, and remarkably handsome, carrying very square udders, and with every evidence of great capacity. I con t know where another lot of fall and early winter cows can be found on the market. E. M. HASTINGS, Lacona, N Y.

KING OF THE BUTTER KINGS

RAG APPLE KORNDYKE

HE IS COMING

His first two daughters to come in milk are now in test; one junior two-year-old has over 16 pounds, averaging nearly four per cent fat; the other has over 15 pounds at one year ten months and averages over four per cent. fat. His daughters will be retained in the herd until after they have been tested.

Let us price you a young bull sired by him and out of a daughter of Pontiac Korndyke, the only living sire of the breed who has produced four daughters that have official records over 30 pounds each.

Marydale Stock Farms.

Marydale Aaggie DeKol was born Jan. 28, 1909, and is ready for service. His dam (De Goede DeKol Pauline 73067), dam s dam and dam's sire's dam have each over 20 lbs. of butter in 7 days.

His sire's dam has 23.5 lbs. His sire's sire's dam and his grandsire's da have each over 26 lbs.

Why is he not a good young bull for anybody to buy?

GRANT B. LOW, NEW BERLIN, N.Y.

Only Two Sons of the Great Sire, Jolantha Johanna Lad, Left.

Each of these Bulls' Two Dams Average Over 31 lbs. of Butter in 7 Days and 4.2% Butter Fat--- Head Your Herd With a Sire of this Quality and Have no Difficulty in Selling Your Surplus Stock.

Oak and Battles Streets, - - Brockton, Mass.

Dutchland Colantha Sir Mona. Sired by *Colantha Johanna Lad,* who has something over sixty daughters at *Dutchland Farms.* Twenty or more will be officially tested the coming winter or spring, and judging from present indications, they will increase the value of every son of Colantha JohannaLad. Dam, Mona Pauline DeKol. She is one of our good cows with a *26.93* A. R. O. record. She is not only a very handsome individual, of perfect conformation, but has proven herself capable of transmitting these qualities to her offspring. She has four or more A. R. O. daughters, three of which have recently increased their records, one making *27.25* lbs. butter in 7 days. 3.97% fat and *109.20* lbs. in 30 days 3.81% fat, and another nearly 25 lbs. as a three-year-old. The other two did equally as well, age considered. We consider this kind of a cow most desirable to select a sire from, as we feel that her son will breed with a degree of certainty.

Dutchland Colantha Sir Mona is mostly white, low down, deep bodied, perfect back line, nice mellow flexible skin, and very yellow in color. He also shows remarkable veins for a young bull. He is the kind we like to send out as a representative of our herd, as we feel confident he will make a reputation for his owner, and thereby reflect credit upon his breeders.

Dutchland Colantha Sir Pietertje. This bull is sired by *Colantha Johanna Lad.* His dam, Kuperus Pietertje DeKol is one of our best and most promising cows. She is still young and we have every reason to expect that she will materially increase her present record of *27.43* lbs. in 7 days and *106.5* lbs. in 30 days. She made this record under unfavorable conditions as she injured a quarter of her udder while in test. Up to that time she was going a 30-lb gait. As she is now in perfect condition, we see no reason why, when conditions come right, she will not enter the 30-lb list. She is a daughter of the great sire, Helena DeKol Artis. This bull has seven daughters that average between 24 and 25 lbs., many of which were tested while young. He is also the grandsire of one *30* and one *32*-lb. cow. The dam of Kuperus Pietertje DeKol, Kuperus Pietertje Hartog. is a sister to the dams of Buttercup Clothilde Pietertje with *32.91* lbs. butter in 7 days, Abbie Hartog Clothilde *31.39* lbs. butter in 7 days and Capitol Pietertje Clothilde with *27.38* lbs. Kuperus Pietertje DeKol's record of *27.43* was made when she was about five years old. She already has two exceptionally good daughters, one made 21.99 and the other 16-97 lbs. and we have another in our herd that ought to do exceptionally well. Dutchland Colantha Sir Pietertje is about evenly marked. He is also low down, perfectly straight on the back, and has a good depth of body. He shows a large amount of constitutional vigor and we feel is rapidly developing into a show animal of the highest order.

This is your last opportunity to select a son Colantha Johanna Lad from this season's crop of calves. Do not let this opportunity escape you and have to wait another year.

REMEMBER, we are breeders not dealers, and are in a position to know the value of every animal offered.

FRED F. FIELD HOLSTEIN COMPANY
